## Government to give 15,000 nonregular workers regular positions by 2017

The government plans to additionally transform about 15,000 nonregular employees working in the public sector to regular employees by next year, according to its task force team on labor reform.

Under the plans released Wednesday, the status of 15,262 nonregular workers in the central government, local governments, state-run corporations and other public workplaces will be changed into regular positions.

The Park Geun-hye administration has pushed for the gradual transformation of nonregular workers to regular employees in the public sector as part of efforts to ensure job security and improve the quality of the labor market.

Since 2013, about 74,000 nonregular public employees have benefitted from the transformation.

### Number of workers to get regular status

	2016	2017
Central government	950	685
Local governments	1,625	1,183
State-run corporations	1,532	433
Local public firms	819	405
Education institutes	5,159	2,471
